Latest Version: 8.1

Question: 1

backups exist, and the maintenance window is approved.
What must be completed before starting the upgrade in this air-gapped environment?

A. Reroute the traffic from the cluster through the bastion host.
B. Seed the registry with the new version's image bundles.
C. Cordon the nodes to be upgraded.
D. Redeploy the bastion host to the target version.

Answer: B

Question: 2

separate Kubernetes clusters for production and development because the software deployed in production is different than development. Now, all production clusters for all business units are standardized and all clusters for development are standardized as well.
The company recently acquired NKP Ultimate licenses for all Kubernetes clusters.
How can the company control the standard configuration for both environments in all clusters (production and development)?

A. Install Flux in every Kubernetes cluster with the appropriate kustomize.yaml, with nkp install flux --kustomize=kustomize.yaml --kubeconfig=<cluster>.conf B. Install Flux in every Kubernetes cluster and configure the appropriate kustomize.yaml in every Kubernetes cluster.
C. Create new Kubernetes clusters for production and development with NKP for every business unit.
D. Configure a production workspace and a development workspace and attach each Kubernetes cluster to the corresponding workspace.

Answer: D

Question: 3

What prerequisite must the administrator ensure is met for this task?

A. UEFI Boot type is not enabled.
B. Kubernetes components are present.
C. Default user must have sudo privileges.
D. Python version 2.x is installed and accessible.

Answer: C

Question: 4

What should the engineer enable to support backups within the NKP environment?

A. MinIO
B. Volumes iSCSI
C. Rook Ceph
D. Objects S3

Answer: A

Question: 5

workload cluster is deployed to a workspace:
Grafana Logging
Grafana Loki
Project Logging
How would the administrator ensure that these components are deployed as part of a cluster deployment?

A. Enable them in the Insights section under workspace.
B. Enable them in the Clusters section under workspace.
C. Enable them in the Application section under workspace.
D. Enable them in the Projects section under workspace.

Answer: C
