Question: 1

In PowerProtect One 20.3, which feature evaluates unusual patterns in backup metadata to identify potential security issues?

A. File Search
B. Anomaly Detection
C. Server DR
D. Dynamic Licensing

Answer: B

Explanation:
Anomaly Detection tracks changes in backup metadata over time and flags unusual patterns for investigation.

Question: 2

An organization wants one place to manage protection policies, alerts, monitoring, and reporting for workloads across on-premises and hybrid environments.
Which PowerProtect One benefit addresses this requirement in the H04599.1 overview?

A. Application-consistent database copies
B. Immutable retention of selected copies
C. Centralized management through an integrated interface
D. Non-disruptive expansion of storage capacity

Answer: C

Explanation:
The integrated interface brings protection policies, alerts, monitoring, and reporting into one place, so administrators can manage protection across on-premises and hybrid workloads.

Question: 3

In the base PowerProtect One architecture described by H04599.1, which component is the 2U storage node?

A. DD6410
B. DM5510
C. ES120 expansion enclosure

D. BOSS card

Answer: A

Explanation:
The base system uses the DD6410 as its 2U storage node.

Question: 4

During Get Started in PowerProtect One 20.3.0.10, an administrator wants to configure the mail server used for application notifications and verify delivery.
Which task provides this configuration and the Send Test Email action?

A. Configure Security
B. Configure Auto Support
C. View Dell Dynamic License
D. Configure Email

Answer: D

Explanation:
Configure Email is where the administrator enters the mail-server and authentication settings. Send Test Email verifies delivery using those settings.

Question: 5

A user with appropriate permissions needs to add a protection policy in the PowerProtect One 20.3.0.10 UI.
Which left-navigation area contains that function?

A. Infrastructure
B. Restore
C. Protection
D. Reports

Answer: C

Explanation:
Protection contains protection policies, SLAs, protection rules and related configuration.
