Question: 1

With Pega's Situational Layer Cake ™ approach, how do you configure a regional variation for Human Resources (HR) time off cases?

A. Create a rule for the variation and add the rule to the common layer of the application.
B. Create a rule for the variation and replace the existing HR time off rule in the application common layer.
C. Create a rule for the variation and add it to a secondary common application layer.
D. Create a rule for the variation and add the rule to the layer for the region.

Answer: C

Question: 2

Select each task on the left and drag it to the corresponding Application Development Studio on the right, where the task can be completed.

Task	Task	Application Development Studio
Review real-time UI designs with stakeholders.		App Studio
Monitor the cloud-based production system at run-time.		Dev Studio
Configure application security, versioning, and source control.		Admin Studio
Globally configure the setting for an Artificial Intelligence model.		Prediction Studio

Answer:

Task	Task	Application Development Studio
Review real-time UI designs with stakeholders.	Review real-time UI designs with stakeholders.	App Studio
Monitor the cloud-based production system at run-time.	Configure application security, versioning, and source control.	Dev Studio
Configure application security, versioning, and source control.	Monitor the cloud-based production system at run-time.	Admin Studio
Globally configure the setting for an Artificial Intelligence model.	Globally configure the setting for an Artificial Intelligence model.	Prediction Studio

Question: 3

An organization has two lines of business: selling books for children and reselling college textbooks.
The division selling books for children can use the same basic user interface (UI) as the division reselling textbooks with the exception of the payment methods.
How do you apply the Situational Layer CakeTM in this scenario?

A. Place the UI rules in the base layer, and create a new layer for the payment rules for both lines of business.
B. Place the UI rules and generic payment method rules in the base layer, and create a new layer for the division-specific payment rules.
C. Place the UI rules in the base layer, and create a parallel base layer for the payments rules.
D. Place the UI rules in the base layer, and create a new layer for the payment rule for each division.

Answer: B

Question: 4

You are designing a form for an online bookstore to display new arrivals. In the form, the book cover pictures are displayed in a row, like words in a sentence. Once the row reaches the full width of the screen, it wraps around to begin a new row.
Which layout do you use to display the book cover pictures?

A. Screen layout
B. Column layout
C. Dynamic layout
D. Repeating layout

Answer: C

Question: 5

An online sales application supports both laptop and mobile devices. You are configuring the application skin and you notice the responsive layout in the mobile device is not displaying views as stakeholders require.
Which two options allow you to resolve this situation without negatively impacting the laptop users? (Choose two.)

A. Use the same application skin in all portals.
B. Update the process to give mobile users a separate portal.
C. Do not use a skin for the mobile application version.
D. Adjust the responsive behavior in the skin for optimal viewing in the mobile portal.

Question: 6

A form listing nearby restaurants has four columns:
Restaurant name
Restaurant location
Thumbnail image of the seating area
Make reservation (check box)
You want to ensure that users have the information they need to make a reservation regardless of screen size. When viewed on a small screen, you do not need to display images.
What three configuration steps do you take to support this requirement? (Choose three.)

A. Set the importance of the Make reservation column to Primary.
B. Set the importance of the Restaurant name column to Primary.
C. Set the importance of the image column to Other.
D. Set the importance of the image column to Secondary.
E. Set the importance of the Restaurant location and Make reservation columns to Secondary.
F. Set the importance of the Restaurant name and Make reservation columns to Primary.

Answer: B,D,F

Question: 7

You want your application to have consistent styling across portals. You want the background color of all buttons in your application to be blue. You want the background color of the buttons to be easily updated in case corporate branding changes.
Which attribute do you modify to set the background color?

A. The application skin
B. The buttons format
C. The controls format
D. The background mixin

Answer: B

Question: 8

What are the minimum components of a user interface (UI) action set?

A. Two actions and one event

B. One action, one event, and one condition

C. One action and one event

D. One action and one condition

Answer: C

Question: 9

A reservation process allows customers to reserve a flight, hotel room, and rental car as part of a travel itinerary.

Which configuration displays a check box to allow users to select travel insurance only if the itinerary includes a flight?

A. A visible when condition applied to the check box

B. An action set applied to the check box

C. A declare expression configured for forward chaining

D. A validate rule applied to the flow action

Answer: B

Question: 10

You are implementing a UI form collecting job applicant information. Users must provide values to certain fields before submitting the form.

Which configuration adds asterisks to indicate the mandatory fields on the form?

A. Use multiple Validate rules for each mandatory field

B. Use an Edit Validate rule to verify if each of the mandatory properties has a value

C. Use a Validate rule to verify the mandatory fields have a value

D. Configure the mandatory fields as Required in the section rule

Answer: C
