### Question: 5

You are implementing Advanced Access Controls and there is a requirement for a control to monitor user access to specific, client-defined access points which give users the ability to both initiate a purchase order and approve payments on that purchase order.  
Which is a valid option to implement the control?

- A. From the "Access Entitlements" page create two entitlements containing the respective client-defined access points. Create an access model from the "Models" tab of Advanced Controls, based on the entitlements you created.
- B. Select Actions > Create Access Control from the "Controls" tab of Advanced Controls.
- C. Create an access model from the "Models" tab of Advanced Controls, and then define an access point filter for each individual client-defined access point.
- D. From the "Access Entitlements" page create two entitlements containing the respective client-defined access points. Create an access model from the "Models" tab of Advanced Controls, based on the entitlements you created. Finally, deploy an access control in the "Controls" tab of Advanced Controls, and select the access model you created.
- E. Create an access entitlement from the "Access Entitlements" page, then select Actions > Create Access Control from the "Controls" tab of Advanced Controls, and select the entitlement you created.

**Answer: D**
