Question: 1

Which component initiates scheduled backups during backup operations?

Response:

- A. Backup server
- B. Backup client
- C. Backup storage node
- D. Backup device

Answer: A

Question: 2

What does the transformation of an operating model for third platform adoption involve?

Response:

- A. Provisioning IT resources through a self-service portal
- B. Establishing new roles and responsibilities to manage IT services
- C. Adopting virtualization technologies to enable automation
- D. Building new technical and business skills in the IT staff

Answer: A

Question: 3

Which technology is used in the media and entertainment industry to enable content-based search activity and to create video subtitles using natural language processing?

Response:

- A. Machine learning
- B. Social networking
- C. Cloud computing
- D. Internet of Things

Answer: A

Question: 4

What is an accurate statement about the application streaming technique of application virtualization?

Response:

- A. Application is downloaded in portions on the client for local execution
- B. Application executes remotely and its user interface is transmitted to the client
- C. Application executes on the client without the use of a locally-installed agent
- D. Application is converted into a standalone package that directly executes on the client

Answer: A

Question: 5

What is an accurate statement about a fabric-provided MAC address (FPMA) used in an FCoE SAN?

Response:

- A. FCoE switches provide MAC addresses to VN_Ports during node login
- B. FC switches provide MAC addresses to VE_Ports dynamically during discovery
- C. Compute systems provide MAC addresses to the VF_Ports on FCoE switches
- D. Both VF_Ports and VE_Ports obtain MAC addresses from FC switches

Answer: A

Question: 6

Why should a replica be consistent with its source?

Response:

- A. Ensure the usability of the replica
- B. Reduce the need to create multiple replicas
- C. Ensure the security of the replica
- D. Reduce the size of the replica

Answer: A

Question: 7

What is an advantage of sub-LUN tiering?

Response:

- A. Faster provisioning of thin LUNs
- B. Dynamic expansion of storage capacity
- C. Improved performance
- D. Enhanced reliability

Answer: C

Question: 8

Which parameter determines the rotation latency of a disk drive?

Response:

- A. Response time
- B. Seek time
- C. Speed of the spindle
- D. Data transfer speed

Answer: C

Question: 9

In a Fibre Channel (FC) protocol stack, what is the function of the FC-1 layer?

Response:

- A. Provide application interfaces and map several protocols to FC layers
- B. Provide standards for physical interface, media, and transmission of bits
- C. Provide fabric services, classes of service, and flow control
- D. Provide transmission words, primitive signals, and link initialization

Answer: D

Question: 10

What is an accurate statement about Infrastructure as a Service?

Response:

- A. Consumer has control over the operating systems and the deployed applications
- B. Consumer only has control over user-specific application configuration settings
- C. Consumer has control over network devices, compute systems, and storage systems
- D. Consumer only has control over the configuration settings of the application-hosting environment

Answer: A
