Question: 1

Identify two ways to modify the overall integration behavior of BigMachines and Salesforce.

- A. Write a custom BML Util library function in BigMachines.
- B. Use the integration XSLs within the Commerce process to modify integration behavior at the object and field levels.
- C. Write a Salesforce API to change integration behavior in BigMachines.
- D. Use the Site Setup object and BigMachines Commerce Package settings in Salesforce to meet varying customer requirements.

Answer: B,D

Question: 2

What are three testing strategies for Oracle SPQ Cloud BigMachines?

- A. Test cases should be directly linked to business requirements.
- B. Avoid using a test case tracking tool because it is time consuming to track all of the testing team's efforts.
- C. Perform isolated tests as well as intra-system and cross-system integration tests.
- D. Create specific test data for accounts, opportunities, and contracts in Salesforce and use that data to perform end-to-end tests for BigMachines quotes.

Answer: A,C,D

Question: 3

A red "x" is showing up instead of a part (item) in a configuration. What is causing this?

- A. The Recommended Item rule is not firing.
- B. The Recommended Item rule is recommending more than one part number.
- C. The Recommended Item rule is recommending a part that does not exist.
- D. The Recommended Item rule is recommending an incorrect price for the part number.

Answer: C

Question: 4

Which Configuration Flow would you choose to design a Configurator where attributes vary based on prior user selections and have a sequential relationship consisting of distinct steps?

- A. Multi Node Configuration Flow
- B. Search Flow
- C. Master Start and End Flow
- D. any Configuration Flow with a combination of Constraint and Hiding rules that meets requirements

Answer: C

Question: 5

Oracle CPQ Cloud provides integration guides for some applications. Identify two such applications.

- A. Salesforce.com
- B. Microsoft Dynamics
- C. Oracle Sales Cloud
- D. Oracle On Demand

Answer: A,C

Question: 6

Which statement is false about FTP (File Transfer Protocol) processing in CPQ Cloud tool?

- A. You must list files in the order in which they should be processed in the upload_list.xml file.
- B. FTP uploads are processed every 60 minutes
- C. You must upload files to the automated folder on the FTP server.
- D. You can use the Bulk Data Service to extract the CSV file format and upload it via FTP automation

Answer: B

Question: 7

You have 50,000 quotes in your CPQ Cloud site. Based on a new requirement that you have received from your client, you have added a new line item attribute to the line item grid, which shows a customer-specific discount for the line item part, fetched from a data table. How would you update the existing quotes to show this discount values?

- A. Update the quotes manually.
- B. Run a mass update to update all quotes.
- C. The existing line items will get updated automatically.
- D. Create a new Commerce library function and pass the quote numbers as input.

Answer: B

Question: 8

Which three Configuration rules support table-based lockups?

- A. Constraint rule
- B. Hiding rule
- C. Recommendation rule
- D. Recommended Item rule
- E. Configuration Flow rule

Answer: A,C,D

Question: 9

How can action buttons be hidden in Commerce?

- A. by using Commerce hiding rule
- B. by using Configuration hiding rules
- C. by using profiles and steps in Commerce
- D. By putting the action button bar on a hidden tab in commerce.

Answer: B

Question: 10

Which two statements are true about the integration of CPQ Cloud (without middleware) with external ERP systems?

- A. The ERP system should support exchange of XML data
- B. CPQ Cloud can call ERP system without using BML
- C. Web Services Definition Language (WSDL) can be used to build an XML request that is sent to ERP systems.
- D. You need two CPQ Cloud actions: one to send a request to an ERP system and another to receive a valid response.

E. Calling an ERP system does not require authentication of any kind.

Answer: B,C
