- ✓ Up to Date products, reliable and verified.
- ✓ Questions and Answers in PDF Format.

Latest Version: 6.0

Question: 1

What is the primary advantage of using SnapLock in ONTAP's data protection solutions?

- A. It allows for the creation of point-in-time copies of data.
- B. It offers write once, read many (WORM) protection for data retention.
- C. It ensures data remains accessible during failures.
- D. It provides data deduplication.

Answer: B

Question: 2

In ONTAP's NAS solutions, which feature provides seamless access to files even if a part of the infrastructure fails?

- A. File mirroring
- B. Multipathing
- C. Continuous availability
- D. File cloning

Answer: C

Question: 3

Your customer has a Windows user that must access a volume with UNIX security style permissions. What must be done to enable the Windows user to access the volume?

- A. The volume's security style must be changed to Mixed.
- B. The Windows user must be mapped to a valid UNIX user.
- C. A separate volume with an NTFS security style must be created.
- D. The volume's security style must be changed to NTFS.

Answer: A

Question: 4

Which of the following is a key consideration when implementing ONTAP's SAN solutions in a virtualized environment?

- A. The physical location of the data center
- B. The brand of the connecting cables
- C. The color of the storage shelves
- D. Ensuring proper alignment of virtual machine file systems with the underlying storage

Answer: D

Question: 5

In ONTAP's performance solutions, which feature is used to automatically move cold data to lower-cost storage tiers?

- A. FabricPool
- B. SnapLock
- C. SnapVault
- D. SnapMirror

Answer: A

Question: 6

Which protocol in ONTAP's SAN solutions provides a means for transporting Fibre Channel traffic over Ethernet networks?

- A. CIFS
- B. NFS
- C. iSCSI
- D. FCoE (Fibre Channel over Ethernet)

Answer: D

Question: 7

Which of the following best describes the function of subnet pools in ONTAP's networking?

- A. Automatically assign IP addresses to logical interfaces
- B. Segment network traffic based on VLAN IDs
- C. Aggregate multiple network ports
- D. Provide data encryption

Answer: A

Question: 8

In ONTAP's SAN solutions, which feature provides a consistent set of LUNs across different storage systems?

- A. LUN set
- B. LUN group
- C. LUN consistency group
- D. LUN pool

Answer: C

Question: 9

Which of the following ONTAP features ensures continuous data availability in SAN environments in case of hardware failures or maintenance activities?

- A. LUN tagging
- B. Multipathing
- C. LUN masking
- D. LUN cloning

Answer: B

Question: 10

What is the primary advantage of using ONTAP's Flash Cache for performance?

- A. It provides data deduplication.
- B. It ensures data remains accessible during failures.
- C. It accelerates read-intensive workloads by caching frequently accessed data.
- D. It allows for the creation of point-in-time copies of data.

Answer: C
