Question: 1

Which of the following environments would require a Huawei camera with high ingress protection (IP) rating?
(Choose Two)

A. Indoor office spaces
B. Coastal areas with high salt content in the air
C. Desert areas with frequent sand storms
D. Areas with stable weather conditions

Answer: B,C

Question: 2

For businesses, the platform's _____ feature is vital for ensuring security in crowded environments.

A. text editing
B. crowd management
C. file sharing
D. video calling

Answer: B

Question: 3

What is a recommended practice for Huawei camera installation to ensure optimal coverage?

A. Installing at the highest possible point
B. Placing cameras at eye level
C. Using minimal cabling for connections
D. Ensuring there is no obstructions in the camera's line of sight

Answer: D

Question: 4

How does incorporating cloud storage in Huawei camera setups benefit video site management?

A. It reduces the physical space needed for storage.
B. It increases the cost of data management.
C. It lowers the resolution of stored videos.
D. It requires more frequent maintenance.

Answer: A

Question: 5

What technological advances support the expansion of video security capabilities?
(Choose Three)

A. Development of low-light cameras
B. Integration of IoT devices
C. Implementation of analog signal transmission
D. Enhanced biometric recognition systems
E. Increasing use of machine learning algorithms

Answer: A,B,E

Question: 6

In what way does 5G technology impact video security systems?

A. It limits the distance over which video data can be transmitted.
B. It allows for higher data throughput and reduced latency.
C. It reduces the resolution of video feeds.
D. It increases the complexity of network management.

Answer: B

Question: 7

Which features should be checked during the basic operation check of a Huawei camera?
(Choose Three)

A. Network connectivity and speed
B. Color accuracy in images
C. Temperature of the camera housing

D. Auto-focus functionality
E. Audio reception quality

Question: 8

Huawei's Intelligent Vision Platform utilizes _____ to improve the accuracy and speed of processing visual data.

A. blockchain
B. cloud computing
C. artificial intelligence
D. analog systems

Question: 9

Which technologies are essential for the modern video security center to function effectively? (Choose Two)

A. Cloud storage solutions
B. Advanced AI-driven analytics
C. Legacy networking protocols
D. Manual monitoring techniques

Question: 10

In the context of Huawei cameras, what does WDR stand for and why is it important?

A. Wide Dynamic Range; it helps capture clear images under varying light conditions
B. Wireless Data Rate; it refers to the speed of data transmission
C. Wired Device Routing; it involves the physical layout of camera wiring
D. Weighted Distribution Ratio; it pertains to the camera's stability
