- A. Unica Platform
- B. Unica Plan
- C. Unica Campaign
- D. Unica Interact

**Answer: A**

### Question: 5

How are strategic segments promoted for use across different partitions in a multi-tenant Unica environment?

- A. They are linked directly to delivery channels and then inherited globally
- B. They are exported manually as XML files and imported into other modules
- C. They are published via the Segment Promotion Tool from within the Unica Platform
- D. They are embedded into offer templates and made available to all campaigns

**Answer: C**

### Question: 6

A company wants to ensure that old campaign run history data is removed every 90 days. Where can this be automated within the Unica ecosystem?

- A. In the housekeeping schedule under Platform Configuration
- B. Through response tracking in Campaign
- C. Inside user variables in the flowchart
- D. Within the Delivery channel settings

**Answer: A**

### Question: 7

Why is it necessary to configure the Audience Level during table mapping in HCL Unica Campaign?

- A. To define the execution priority of campaign flowcharts in a distributed environment
- B. To specify the granularity at which campaign segmentation and tracking occur (e.g., Customer, Account)

- C. To automatically generate response history reports
- D. To restrict access to strategic segments for security compliance

**Answer: B**

### **Question: 8**

During campaign execution, which two outputs are generated from a flowchart run for monitoring and diagnostics?  
(Choose two)

- A. Strategic Segment status reports
- B. Process Box output tables
- C. Detailed Run Logs for each step
- D. Campaign Offer Feedback reports

**Answer: B,C**
