- ✓ Up to Date products, reliable and verified.
- ✓ Questions and Answers in PDF Format.

Latest Version: 6.0

Question: 1

Which two actions are needed to create a custom alert for a Mule application deployed to CloudHub?
(Choose two.)

- A. Add Anypoint Connector for CloudHub to the Mule application
- B. Configure the custom application alert in Runtime Manager
- C. Configure an email server for the alert notification to be sent
- D. Enable alerts in Runtime Manager

Answer: A,B

Question: 2

A MuleSoft architect has defined requirements for a project. Which three tools can convert the project requirements into capabilities to design, validate, and publish APIs?
(Choose three.)

- A. Exchange
- B. Anypoint Monitoring
- C. Design Center
- D. Mocking service
- E. Runtime Manager
- F. API libraries

Answer: A,C,D

Question: 3

In which scenario is the use of Object Store (OS) most recommended with CloudHub?

- A. Storing transient application data
- B. Long-term archival of data
- C. Storing user session data
- D. Backup for on-premises databases

Answer: C

Question: 4

According to the API-led connectivity approach MuleSoft recommends, what is a best practice when building system APIs?

- A. Build an Enterprise Data Model (Canonical Data Model) for all back-end systems and apply it to system APIs
- B. Expose the details of the API implementation's interaction with the back-end system to API clients
- C. Expose the metadata of the back-end system
- D. Document the system API using an easily consumable asset like a RAML definition

Answer: D

Question: 5

What is a typical result of using a fine-grained, rather than a coarse-grained, API deployment model to implement a given business process?

- A. An overall lower usage of resources because each fine-grained API consumes fewer resources
- B. A higher number of discoverable, API-related assets in the application network
- C. A better response time for the end user as a result of the APIs being smaller in scope and complexity
- D. A decrease in the number of connections within the application network supporting the business process

Answer: B

Question: 6

How should a customer using Runtime Fabric on self-managed Kubernetes monitor their worker node health and core capacity?

- A. Use Runtime Fabric Ops Center
- B. Use tooling provided by the Kubernetes provider
- C. Use the Infrastructure tab within Anypoint Monitoring
- D. Use Anypoint Platform APIs to retrieve real-time node performance data

Answer: B

Question: 7

Which scenario benefits from horizontal scaling?

- A. An API proxy that receives frequent but small payloads
- B. An API that receives infrequent but large JSON payload
- C. An API that performs heavy data transformation
- D. API implementations that are stateful in nature

Answer: A

Question: 8

Compare and contrast CloudHub networking when integrated with customer-owned Amazon VPCs and on-premises data centers. What is a key advantage of using Amazon VPCs?

- A. Faster deployment speeds
- B. Better security due to physical isolation
- C. Lower latency compared to on-premises connections
- D. Easier scalability

Answer: D

Question: 9

The responses to some HTTP requests can be cached depending on the HTTP verb used in the request. According to the HTTP specification, what are the safe methods to use?

- A. GET, HEAD, POST
- B. GET, OPTIONS, HEAD
- C. PUT, POST, DELETE
- D. GET, PUT, OPTIONS

Answer: B

Question: 10

A team working at a multinational bank introduced a new System API into their environment. What are two reasons the team made this decision?
(Choose two.)

- A. Payment requests coming through the system had to be routed to a new fraud engine that was introduced at the bank

- B. The administration system did not authorize requests and was having data erroneously modified due to unauthorized requests
- C. An external vendor that integrated with the bank's systems changed their client from one that interacted with SOAP interfaces to one that required RESTful interfaces
- D. The administration system's interface utilized an overly complex model, the majority of which was not applicable to the bank's business

Answer: B,D
