Developing Hybrid Models with SAP HANA

Question: 1

You create an SAP HANA HDI Calculation View in SAP Web IDE for SAP HANA and have to select a data category which data category allows you to create restricted columns? Note: There are 2 correct answers to this question.

- A. Cube with Star Join
- B. Dimension
- C. SQL Access Only
- D. Cube without Star Join

Answer: A, D

Question: 2

Which of the following SAP BW/4HANA objects support the automatic generation of external SAP HANA views? Note: There are 3 correct answers to this question

- A. Info Object Characteristic
- B. BW Query
- C. Open ODS View
- D. Composite Provider
- E. Open Hub Destination

Answer: A, B, D

Question: 3

You would like to implement a virtual mixed scenario in your SAP BW/4HANA system. Which approach does SAP recommend for this kind of scenario? Note: There are 3 correct answers to this question

- A. Model a Data Store object (advanced) and use an ABAP CDS View for virtual access.
- B. Generate external SAP HANA views of SAP BW/4HANA Info Providers to consume this SAP BW/4HANA data in SAP HANA
- C. Load SAP HANA data into SAP BW/4HANA Info Providers based on the Operational Data Provisioning (ODP) framework
- D. Model a Composite Provider that combines data from multiple SAP BW/4HANA Info Providers and SAP HANA Views
- E. Define an Open ODS View that integrates an SAP HANA table into SAP BW/4HANA

Answer: B, C, D

Question: 4

You imported a project into SAP Web IDE for SAP HANA to develop an SAP HANA HDI Calculation View. At which level of the Workspace hierarchy do you have to assign a Space?

- A. Workspace
- B. Project
- C. HDB Module
- D. Package

Answer: B

Question: 5

You want to create an SAP HANA HDI Calculation View that consumes an External SAP HANA View representing a Data Store Object (advanced). What needs to be defined? Note: There are 2 correct answers to this question

- A. Package
- B. Synonym
- C. Cross-schema Service
- D. Delivery Unit

Answer: A, C

Question: 6

What are valid reasons to generate external SAP HANA Views for SAP BW/4HANA objects? Note: There are 2 correct answers to this question

- A. To leverage the SAP BW Analytic Manager to process BW Queries.
- B. To access data in the COLD tier of SAP BW/4HANA Data Tiering Optimization (DTO)
- C. To consume SAP BW/4HANA data and manage access with native SAP HANA concepts
- D. To apply SAP HANA transformational logic instead of SAP BW/4HANA logic.

Answer: C, D

Question: 7

You switch on the "External SAP HANA view flag in the settings for a Data Store object (advanced) and activate it. Which authorizations are used when you consume the SAP HANA view directly for reporting?

- A. The existing Data Store object (advanced) analysis authorizations in SAP BW/HANA.
- B. The existing Data Store object (advanced) object authorizations in SAP BW/4HANA.
- C. The generated privileges in SAP HANA
- D. The generated authorizations for the HDI container access in SAP HANA

Answer: C
