Question: 1

HOTSPOT
For each of the following statements, select Yes if the statement is true. Otherwise, select No.
NOTE: Each correct selection is worth one point.

Answer Area

Statements	Yes	No
You can add a Microsoft Teams chat as a knowledge source to a Microsoft 365 Copilot agent.	○	○
You can add a Microsoft 365 Copilot conversation as a knowledge source to a Copilot agent.	○	○
You can use an image file, such as a JPG file, as a knowledge source for a Microsoft 365 Copilot agent.	○	○

Answer:

Answer Area

Statements	Yes	No
You can add a Microsoft Teams chat as a knowledge source to a Microsoft 365 Copilot agent.	○	○
You can add a Microsoft 365 Copilot conversation as a knowledge source to a Copilot agent.	○	○
You can use an image file, such as a JPG file, as a knowledge source for a Microsoft 365 Copilot agent.	○	○

Question: 2

You are creating a prompt in Microsoft 365 Copilot to get information about a proposal. You need to ensure that the response is grounded in the proposal's information.
What is the best approach to achieve the goal? More than one answer choice may achieve the goal. Select the BEST answer.

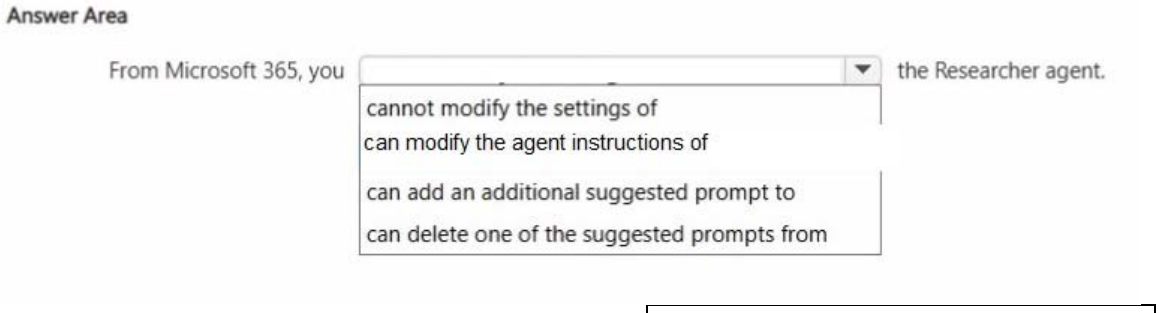

A. Instruct Copilot to rely on its training data to infer proposal details.
B. Add a specific goal that you want Copilot to accomplish.
C. Reference the proposal content in the prompt.
D. Add context about the intended audience.

Answer: C

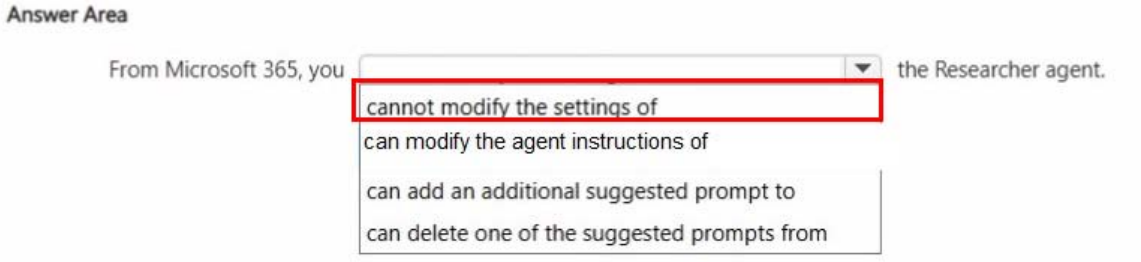

Explanation:
According to Microsoft AI Business Professional guidance for Microsoft 365 Copilot, grounding a response means ensuring the AI generates output based on specific, authoritative content rather than relying on generalized training data. When working with enterprise documents such as proposals, grounding is achieved by explicitly referencing the source material within the prompt.
Option C is correct because referencing the proposal content directs Copilot to use that specific document as the primary context for generating the response. Microsoft documentation emphasizes that effective prompts should include clear context and explicit references to relevant files, meetings, emails, or documents stored in Microsoft 365. This reduces hallucinations and ensures factual alignment with organizational data.
Option A is incorrect because relying on training data increases the risk of inaccurate or fabricated information. Options B and D improve prompt clarity but do not guarantee grounding in the proposal itself.
Therefore, explicitly referencing the proposal content is the most reliable and best practice method for ensuring grounded, accurate responses in Microsoft 365 Copilot.

Question: 3

HOTSPOT
Select the answer that correctly completes the sentence.

Answer:

Question: 4

You use Microsoft 365 Copilot.

You discover that you had a conversation that used a knowledge source that contains confidential information.
You need to delete the conversation data without requiring administrative approval. You must retain your other conversations, if possible.
What should you use?

A. the Microsoft 365 Copilot app
B. the Microsoft 365 admin center
C. the Microsoft Purview compliance portal
D. the My Account portal in Microsoft 365 Copilot

Answer: D

Explanation:
Microsoft 365 Copilot follows Microsoft's enterprise data governance and privacy principles, which allow users to manage their own conversation history where appropriate. According to Microsoft AI Business Professional guidance, users can review and delete individual Copilot conversation histories directly from their personal account settings without requiring administrative intervention.
Option D is correct because the My Account portal in Microsoft 365 Copilot allows individual users to manage their activity history, including deleting specific conversations. This enables targeted removal of sensitive interactions while retaining other conversation data.
Option A is incorrect because the Copilot app itself does not provide full account-level activity management capabilities. Options B and C are administrative tools used for tenant-wide governance, compliance, retention policies, and eDiscovery. These portals typically require administrative privileges and are not intended for individual user self-service deletion of specific conversations.
Therefore, to delete a single confidential Copilot conversation without affecting other chats and without requiring administrator approval, the correct tool is the My Account portal in Microsoft 365 Copilot.

Question: 5

HOTSPOT
Select the answer that correctly completes the sentence.

a specific date range of activity

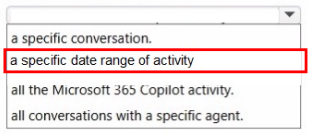

From the Microsoft 365 My Account portal , if you select Delete history for the Copilot activity history, you can delete

- a specific conversation.
- a specific date range of activity
- all the Microsoft 365 Copilot activity.
- all conversations with a specific agent.

Answer:

a specific date range of activity

From the Microsoft 365 My Account portal , if you select Delete history for the Copilot activity history, you can delete
