# Latest Version: 7.0

## Question: 1

An administrator wants to ensure that ArcGIS Enterprise services can scale during periods of high demand. Which deployment strategy best supports scalability?

Response:

- A. Single-machine deployment
- B. Multi-machine ArcGIS Server sites
- C. Developer edition deployment

**Answer: B**

## Question: 2

A portal administrator wants to manage user access using existing enterprise identities. Which configuration supports this?

- A. Built-in authentication
- B. Enterprise authentication
- C. Token-based authentication only

**Answer: B**

## Question: 3

An administrator must prevent accidental deletion of critical content. What strategy helps?

- A. Limit delete privileges in custom roles
- B. Increase thumbnail resolution
- C. Enable anonymous access

**Answer: A**

## Question: 4

An administrator plans to upgrade ArcGIS Enterprise with minimal user impact. Which timing strategy is most appropriate?

- A. Portal branding files
- B. ArcGIS Server configuration store
- C. Portal user thumbnails

**Answer: B**

### Question: 5

Users report intermittent failures when accessing hosted feature services. Log entries repeatedly show “Database connection timeout” messages. What is the most likely component requiring investigation?

- A. ArcGIS Data Store (relational)
- B. Web Adaptor configuration
- C. Portal content directory permissions

**Answer: A**

### Question: 6

Which symptom most strongly indicates network latency between ArcGIS Enterprise components?

- A. Slow portal login times
- B. Intermittent service timeouts under load
- C. Missing portal thumbnails

**Answer: B**

### Question: 7

Which action allows users to discover authoritative datasets more easily?

- A. Assign authoritative badges and proper metadata
- B. Increase service instance limits
- C. Disable log rotation

**Answer: A**

### Question: 8

Which portal setting controls whether users can create new groups?

- A. Group creation privileges
- B. Content sharing rules
- C. Portal theme options

**Answer: A**

### Question: 9

An administrator must disable a compromised user account immediately. What is the correct action?

- A. Reset group thumbnails
- B. Disable the user account in Portal
- C. Remove hosting server designation

**Answer: B**

### Question: 10

An administrator is designing an ArcGIS Enterprise deployment and wants to separate publicly accessible services from internal-only services. Which approach best supports this requirement?

- A. Deploy multiple ArcGIS Server sites with different roles
- B. Use a single ArcGIS Server site and restrict sharing
- C. Disable anonymous access for the entire portal

**Answer: A**
