Question: 1

Why is visibility into AD authentication activity critical?
Response:

- A. It increases reporting complexity
- B. It helps detect compromised accounts early
- C. It replaces endpoint telemetry
- D. It reduces system performance

Answer: B

Question: 2

An attacker attempts credential theft using suspicious authentication behavior. Which SES Complete capability helps detect this activity?

- A. Application Control
- B. Threat Defense for Active Directory
- C. Adaptive Protection
- D. Host Integrity

Answer: B

Question: 3

Which ICDm capability enables administrators to take direct action on detected events?

- A. Reporting dashboard
- B. Response actions
- C. Policy versioning
- D. Device grouping

Answer: B

Question: 4

What outcome is expected from properly configured ICDm workflows?

- A. Increased false positives
- B. Faster detection and remediation
- C. Reduced endpoint visibility
- D. Manual-only response processes

Answer: B

Question: 5

Which SES Complete feature provides protection against fileless attacks?

- A. Machine Learning and behavior analysis
- B. Device group inheritance
- C. Policy versioning
- D. Email enrollment

Answer: A

Question: 6

Which data sources are typically reviewed during an ICDm investigation?
(Select all that apply)

- A. Endpoint telemetry
- B. Network activity logs
- C. Policy assignment history
- D. Alert details

Answer: A,B,D

Question: 7

Which benefit is directly associated with SES Complete cloud-based management?

- A. Elimination of endpoint agents
- B. Reduced need for endpoint telemetry
- C. Centralized visibility without on-premises management servers
- D. Mandatory offline policy enforcement

Answer: C

Question: 8

Which capability enables EDR to identify suspicious endpoint activity?

- A. Behavior analytics
- B. Device grouping
- C. Policy inheritance
- D. Content updates

Answer: A

Question: 9

Which type of attack is specifically addressed by Threat Defense for Active Directory?

- A. Network denial-of-service
- B. Identity-based attacks
- C. Endpoint ransomware
- D. Software vulnerability exploitation

Answer: B

Question: 10

What is the primary benefit of using ICDm reports?

- A. Automating endpoint enrollment
- B. Providing summarized threat and activity insights
- C. Configuring security policies
- D. Enforcing application restrictions

Answer: B
