Question: 1

What is a common challenge associated with managing IAM in hybrid cloud environments?

A. Simplified compliance with single regulatory standards
B. Seamless integration of IAM roles and policies across on-premises and cloud platforms
C. Reduced complexity in handling user identities and permissions
D. Ensuring consistent IAM policies across multiple environments

Answer: D

Question: 2

How does implementing MFA affect the security of cloud environments?

A. Reduces security by simplifying the authentication process
B. Has no impact on security but improves user convenience
C. Significantly enhances security by adding an additional layer of verification
D. Only necessary for administrators, not regular users

Answer: C

Question: 3

What is the impact of cloud computing on enterprise mobility?

A. It limits access to resources to on-site employees only.
B. It enhances flexibility by allowing employees to access resources from any location.
C. It reduces the variety of devices that can be used to access resources.
D. It makes data less available to employees.

Answer: B

Question: 4

Why is it important to perform regular security audits in cloud environments?

A. To ensure continuous compliance and address new vulnerabilities.
B. To comply with aesthetic standards.
C. To reduce the effectiveness of security controls.
D. To focus solely on outdated security practices.

Answer: A

Question: 5

In cloud environments, who is primarily responsible for managing the security of the applications and data?

A. The cloud service provider (CSP)
B. The customer
C. A third-party auditor
D. Regulatory bodies

Answer: B

Question: 6

Which cloud network security technology isolates database servers from the internet?

A. Subnetting
B. Load balancing
C. Direct Connect
D. Content delivery networks

Answer: A

Question: 7

How does effective governance support cloud scalability?

A. By preventing any changes to cloud resources.
B. By providing frameworks that support secure and controlled growth of cloud resources.
C. By discouraging the use of cloud resources.
D. By limiting access to cloud services to a small number of users.

Answer: B

Question: 8

How do risk management frameworks assist organizations using cloud services?

A. By providing a structured approach to identifying, assessing, and managing risks.
B. By encouraging random and unstructured risk management practices.
C. By eliminating the need for risk assessment.
D. By focusing solely on non-technical aspects.

Answer: A

Question: 9

Which cloud deployment model allows organizations to share computing resources with other organizations?

A. Private Cloud
B. Public Cloud
C. Community Cloud
D. Hybrid Cloud

Answer: C

Question: 10

Which technology provides transparency over data access and sharing in cloud environments?

A. Data Loss Prevention (DLP)
B. Transport Layer Security (TLS)
C. Public key infrastructure (PKI)
D. Cloud Access Security Broker (CASB)

Answer: D
