Question: 1

Service is being installed on the system using SMP/E APPLY with BYPASS(HOLDERERROR). What effect will this have on APPLY processing?

- A. PTFs that have been marked as PE will be applied
- B. PTFs flagged with ++HOLDERERROR will be applied
- C. PTFs with a HOLDSYSTEM ID of ENH will be applied
- D. PTFs having ++HOLDS will NOT be marked in ERROR

Answer: A

Question: 2

Which consideration is important when adding or removing libraries from the Authorized Program Facility (APF) or the link list?

- A. Adding all datasets to both the APF list and the link list for consistency
- B. Ensuring the library datasets are backed up immediately before making changes
- C. Ensuring all datasets in the link list are on different physical volumes for redundancy
- D. Verifying that the changes do not disrupt existing system security or program authorization

Answer: D

Question: 3

What are the important parameters required to IPL the system which the Operator enters on the HMC?

- A. Load Address and Catalog
- B. Load Address and LPAR profile
- C. Load Address and Load Parameter
- D. Load Address and Master Scheduler

Answer: C

Question: 4

On a z/OS LPAR with thousands of users, a facility must be designed to automatically mount a user's file system whenever they access a file within it. Which facility in z/OS Unix System Services provides this functionality?

- A. sysmount
- B. automount
- C. usermount
- D. mountpoint

Answer: B

Question: 5

Which two (2) device characteristics are most important when defining a DASD storage group?
Select all that apply

- A. Size of track
- B. Data transfer rate
- C. Physical capacity
- D. Tracks per cylinder
- E. Manufacturer/brand

Answer: A,D

Question: 6

Which NETSTAT command displays information about local IPv4 users of TCP/IP services?

- A. CONN
- B. APPS
- C. CLIENTS
- D. ALLCONN

Answer: C

Question: 7

What type of Warm Start does JES2 perform when there are no active members or only one member in the configuration?

- A. Hot start
- B. All members

- C. Quick start
- D. Single-member

Answer: B

Question: 8

Which PARMLIB member specifies a USE attribute to a storage volume?

- A. VATLSTxx
- B. IEASYSxx
- C. LOADxx
- D. SMFPRMxx

Answer: A

Question: 9

What is the primary purpose of the BEGINPARALLEL statement in IEFSSNxx PARMLIB member?

- A. To execute commands sequentially in a defined order rather than in parallel
- B. To begin termination of all ongoing commands of the listed subsystems in parallel
- C. To specify that the initialization of the listed subsystems should occur in parallel
- D. To execute specific commands over others during the beginning of parallel initialization

Answer: C

Question: 10

Systems management tasks are completed on the HMC to alter, control or monitor the definitions on the CPC.

(select all that apply)

- A. The HMC interacts directly with only one CPC and issues the commands
- B. The HMC relays commands to the Support Element on one of the managed CPCs
- C. The HMC issues the required OS console commands to update each Logical partition
- D. The HMC issues the required OS console commands simultaneously to multiple CPCs using a multi-channel transmission
- E. The HMC can communicate simultaneously to multiple Support Elements on managed CPCs

Answer: B,E
