Question: 1

Which of the following can the Explain capability in Joule provide?
Choose the correct answer.

- A. Simple explanations of ABAP code
- B. Automatic generation of UIs
- C. Performance analysis of ABAP code
- D. Suggestions for database optimization

Answer: A

Question: 2

What must you do when you create an ABAP package?
There are two correct answers.

- A. Use the letter Z or Y as the first character in the name
- B. Assign the package to an application component
- C. Assign the package to a software component
- D. Declare what other packages can use the contents of the package.

Answer: A,C

Explanation:

- A. Use the letter Z or Y as the first character in the name

Custom ABAP objects must begin with Z or Y to avoid conflicts with SAP standard packages.

- C. Assign the package to a software component

Each ABAP package must belong to a software component, which organizes development and transport objects.

Question: 3

Which of the following characters is not allowed in the name of an ABAP class?
Choose the correct answer.

- A. 8
- B. _
- C. \$

Answer: C

Question: 4

In ABAP source code, how do you navigate to the definition of a development object?
Choose the correct answer.

- A. Double-click the name of the object
- B. Position the cursor on the name of the object and press F2
- C. Position the cursor on the name of the object and press F3

Answer: C

Explanation:

- F3 opens the definition of the object (class, method, table, etc.) in ADT or ABAP Editor.
- F2 provides technical information, and double-clicking is not standard navigation.

Question: 5

Which of the following is a key feature of ABAP AI Capabilities?
Choose the correct answer.

- A. Automated deployment to SAP BTP
- B. Predictive code completion
- C. Real-time monitoring of application performance
- D. Automatic translation of ABAP code to other languages

Answer: B

Explanation:

- ABAP AI Capabilities assist developers with predictive suggestions while coding, improving productivity.
- It does not automatically deploy, monitor performance, or translate code.

Question: 6

What is the primary purpose of the ABAP AI SDK?
Choose the correct answer.

- A. To provide a development environment for creating ABAP code
- B. To manage user authorizations in ABAP systems
- C. To enable the development of custom AI-enabled business applications
- D. To automate the deployment of ABAP applications to the cloud

Answer: C

Question: 7

An ABAP Cloud Project in ABAP Development Tools (ADT) allows you to connect to what kinds of system?

There are two correct answers.

- A. SAP BTP ABAP instance
- B. On-Premise ABAP system
- C. Embedded ABAP instance in SAP S/4HANA Cloud

Answer: A,C

Question: 8

Which of the following predefined ABAP types are complete?

There are two correct answers.

- A. C
- B. D
- C. P
- D. I

Answer: B,D
