Question: 1

A secure internal application must consume enterprise data without exposing it publicly. What sharing level should be used?

- A. Organization-only sharing
- B. Public sharing
- C. Email attachment only

Answer: A

Question: 2

An organization wants to share data securely over the web while ensuring encrypted communication. Which protocol supports this?

- A. HTTP only
- B. FTP
- C. HTTPS

Answer: C

Question: 3

A map will be printed at multiple scales. Which configuration ensures labels appear only at appropriate zoom levels?

- A. Set scale ranges for labeling
- B. Increase label font size
- C. Convert labels to graphics

Answer: A

Question: 4

During editing, features are snapping incorrectly due to precision issues. What setting should be reviewed?

- A. Symbology color ramp
- B. XY tolerance and resolution
- C. Layout page size

Answer: B

Question: 5

A dataset must enforce that parcel area is greater than zero. What configuration ensures this during editing?

- A. Constraint attribute rule
- B. Symbol layer drawing
- C. Map bookmark

Answer: A

Question: 6

A large feature class performs slowly during attribute queries. What design change could improve performance?

- A. Remove domains
- B. Convert to shapefile
- C. Add attribute indexes

Answer: C

Question: 7

To track who edited features and when, what should be enabled?

- A. Topology validation
- B. Editor Tracking
- C. Raster pyramids

Answer: B

Question: 8

During a countywide data integration project, parcel datasets from multiple municipalities contain different field names for the same attribute (e.g., PARCEL_ID vs PID). What is the most efficient approach before appending the datasets?

- A. Export each dataset to CSV
- B. Use the Clip tool
- C. Use the Field Map parameter in the Append tool

Answer: C

Question: 9

To enforce that hydrant features must snap to water main lines during editing, what should be configured?

- A. Topology rules in a geodatabase
- B. Map bookmarks
- C. Layer transparency settings

Answer: A

Question: 10

A cartographer needs to improve drawing performance in a large map containing multiple high-resolution raster layers. What configuration change would most improve visualization efficiency?

- A. Disable parallel processing
- B. Enable map caching and adjust display quality
- C. Convert all rasters to shapefiles

Answer: B
