Question: 1

SIMULATION

Configure an identity provider

Configure your OpenShift cluster to use an HTPasswd identity provider with the following requirements:

The name of the identity provider is: ex280-htpasswd The name of the secret is: ex280-idp-secret

The user account armstrong=indionce The user account collins=veraster The user account

aldrin=roonkere The user account jobs=sestiver

The user account wozniak=glegunge

Answer: See the solution below in Explanation.

Explanation:

Solution:

```
$ sudo yum install httpd-tools -y
```

```
$ htpasswd -c -B -b htpasswd-file-upload armstrong indionce
```

```
$ htpasswd -B -b htpasswd-file collins veraster
```

```
$ htpasswd -B -b htpasswd-file aldrin roonkere
```

```
$ htpasswd -B -b htpasswd-file jobs sestiver
```

```
$ htpasswd -B -b htpasswd-file wozniak glegunge
```

```
$ oc create secret generic ex280-idp-secret --from-file
```

```
htpasswd=htpasswd-file -n openshift-config
```

```
$ oc get oauth/cluster -o yaml > oauth.yaml
```

```
$ vim oauth.yaml
```

```
$
```

esc--> type :set paste --> enter --> insert --> then paste the content for correct indent pasting

spec:

identityProviders:

```
- name: ex280-htpasswd mappingMethod: claim type: HTPasswd htpasswd:
```

fileData:

```
name: ex280-idp-secret
```

```
$ oc replace -f oauth.yaml
```

```
$ oc login -u armstrong -p indionce
```

```
$ oc login -u collins -p veraster
```

```
$ oc login -u aldrin roonkere
```

```
$ oc login -u jobs sestiver
```

```
$ oc login -u wozniak -p glegunge
```

#This below part of operation is completely optional and done just for handy login purpose

```
$ alias _kube="oc login -u kubeadmin -p ${kube_pass} ${api_url}"
$ alias _armstrong="oc login -u armstrong -p ${armstrong}
${api_url}"
$ alias _collins="oc login -u collins -p ${collins} ${api_url}"
$ alias _aldrin="oc login -u aldrin -p ${aldrin} ${api_url}"
$ alias _jobs="oc login -u jobs -p ${jobs} ${api_url}"
$ alias _wozniak="oc login -u wozniak -p ${wozniak} ${api_url}"
$ _armstrong;_armstrong;_collins;_aldrin;_jobs;_wozniak;
```

Question: 2

SIMULATION

Configure cluster permissions

Configure your OpenShift cluster to meet the following requirements: The user account jobs can perform cluster administration tasks The user account wozniak can create projects

The user account wozniak cannot perform cluster administration tasks The user account armstrong cannot create projects

The user account kubeadmin is not present

Answer: See the solution below in Explanation.

Explanation:

Solution:

```
$ oc adm policy add-cluster-role-to-user cluster-admin jobs
$ oc adm policy remove-cluster-role-from-group self-provisioner
system:authenticated:oauth
$ oc adm policy add-cluster-role-to-user self-provisioner wozniak
$ oc delete secret kubeadmin -n kube-system
```

Question: 3

SIMULATION

Configure project permissions

Configure your OpenShift cluster to meet the following requirements: The following projects exist: apollo manhattan gemini bluebook titan

The user account armstrong is an administrator for project apollo and project gemini

The user account wozniak can view project titan but not administer or delete it

Answer: See the solution below in Explanation.

Explanation:

Solution:

```
$ oc new-project apollo
$ oc new-project manhattan
$ oc new-project gemini
$ oc new-project bluebook
$ oc new-project titan
$ oc adm policy add-role-to-user admin armstrong -n apollo
$ oc adm policy add-role-to-user admin armstrong -n gemini
$ oc adm policy add-role-to-user view wozniak -n titan
```

Question: 4

SIMULATION

Configure groups

Configure your OpenShift cluster to meet the following requirements: The user account armstrong is a member of the commander group The user account collins is a member of the pilot group

The user account aldrin is a member of the pilot group

Members of the commander group have edit permission in the apollo project Members of the pilot group have view permission in the apollo project

Answer: See the solution below in Explanation.

Explanation:

Solution:

```
$ oc adm groups new commander
$ oc adm groups new pilot
$ oc adm groups add-users commander armstrong
$ oc adm groups add-users pilot collins
$ oc adm groups add-users pilot aldrin
$ oc adm policy add-role-to-group edit commander -n apollo
$ oc adm policy add-role-to-group view pilot -n apollo
```

Question: 5

SIMULATION

Configure quotas

Configure your OpenShift cluster to use quotas in the manhattan project with the following requirements:

The name of the ResourceQuota resource is: ex280-quota

The amount of memory consumed across all containers may not exceed 1Gi

The total amount of CPU usage consumed across all containers may not exceed

2 full cores

The maximum number of replication controllers does not exceed 3 The maximum number of pods does not exceed 3

The maximum number of services does not exceed 6

Answer: See the solution below in Explanation.

Explanation:

Solution:

```
$ oc project manhattan
```

```
$ oc create quota ex280-quota --
```

```
hard=memory=1Gi,cpu=2,pods=3,services=6,replicationcontrollers=3
```

```
$ oc get resourcequota
```
