Question: 1

Which of the following is a key benefit of automation development in business processes?

- A. Increased human workforce requirements
- B. Reduced operational costs and increased efficiency
- C. Greater complexity in manual processes
- D. More job opportunities for humans

Answer: B

Question: 2

What is the primary role of the "Deployment Manager" in the deployment process?

- A. To operate robots in the production environment
- B. To manage project timelines
- C. To automate the deployment of software solutions
- D. To develop web applications

Answer: C

Question: 3

In deployment, what is a "Staging Environment"?

- A. An environment where automation solutions are tested before deploying to production
- B. A virtual environment for robots to operate in
- C. The final production environment
- D. A practice area for software developers

Answer: A

Question: 4

What is an example of an advanced automation technique used in Pega Robotics?

- A. Basic data entry
- B. Mouse clicks
- C. Exception handling
- D. Error logging

Answer: C

Question: 5

Why is "Version Control" important in the deployment process?

- A. To increase the complexity of the automation script
- B. To manage project budgets
- C. To keep track of physical robots
- D. To maintain and control different versions of automation solutions

Answer: D

Question: 6

In the context of Pega Robotics, what is the purpose of deployment?

- A. To create the initial project design
- B. To send robots to remote locations
- C. To move automation solutions from development to production environments
- D. To record user interactions with applications

Answer: C

Question: 7

Which component in Pega Robotics allows you to define the structure and format of data exchanged during integration?

- A. Object Explorer
- B. Data Connector
- C. Solution Explorer
- D. Schema Editor

Answer: D

Question: 8

What type of data is often matched using a Regular Expression Match Rule?

- A. Audio files
- B. Text-based data
- C. Image files
- D. Video files

Answer: B

Question: 9

Why is interrogating a target application an essential step in Pega Robotics development?

- A. To manage project timelines
- B. To identify potential project team members
- C. To gather user feedback on the application's design
- D. To extract information about the application's structure and elements

Answer: D

Question: 10

What is the primary purpose of debugging in software development, including Pega Robotics?

- A. To document the code for future reference
- B. To identify, isolate, and fix issues in the code
- C. To remove all errors and bugs from the code
- D. To make code run faster

Answer: B
