Question: 1

A marketing contributor wants to retrieve all approved assets related to a product launch campaign quickly without browsing multiple folder hierarchies manually. Which capability should be used?

- A. Metadata-driven search and Collections
- B. Dispatcher cache invalidation
- C. OSGi repository replication
- D. Cloud Manager deployment filtering

Answer: A

Question: 2

A digital asset governance lead wants campaign Projects to support scalable collaboration and visibility while reducing confusion between contributors and reviewers. Which operational strategy should be prioritized?

- A. Disable reusable workflow templates
- B. Maintain centralized Project governance and workflow standards
- C. Separate repositories by reviewer groups
- D. Remove approval status metadata

Answer: B

Question: 3

A regional marketing team wants to share approved promotional assets externally while ensuring branding consistency across all channels. Which operational strategy should be implemented?

- A. Organize assets exclusively by upload date
- B. Disable Smart Tagging before distribution
- C. Remove Collections from campaign repositories
- D. Distribute approved Dynamic Media renditions with governed metadata

Answer: D

Question: 4

A global content operations organization wants campaign workflows and collaborative Projects to remain scalable and governance-driven as asset volume and contributor participation increase significantly across regions. Which two operational strategies best support this objective? (Choose two)

- A. Maintain standardized workflow approval governance across departments
- B. Use centralized Project structures with role-based collaboration controls
- C. Disable reusable workflow templates and notification routing
- D. Allow unrestricted contributor-defined workflow stages and approvals

Answer: A,B

Question: 5

A content author cannot determine which asset version is approved for current campaign use because multiple similar files appear in search results. What is the most appropriate improvement strategy?

- A. Separate repositories by upload year
- B. Disable Collections functionality
- C. Apply version governance and approval metadata standards
- D. Remove metadata inheritance structures

Answer: C

Question: 6

A digital librarian notices contributors are distributing assets externally before legal review is completed. What is the most appropriate governance improvement?

- A. Remove Collections from campaign workflows
- B. Disable Smart Tagging during uploads
- C. Separate repositories by contributor
- D. Require workflow-based approval before asset distribution

Answer: D

Question: 7

A librarian wants authors to find assets more efficiently through keyword searches and automated categorization. Which feature should be configured?

- A. Smart Tagging
- B. Dispatcher invalidation
- C. Cloud Manager pipelines
- D. OSGi indexing bundles

Answer: A

Question: 8

Which two practices improve asset discoverability in Adobe Experience Manager Assets?
(Choose two)

- A. Apply consistent metadata standards
- B. Disable Smart Tagging
- C. Use descriptive tags and keywords
- D. Store assets without folder hierarchy

Answer: A,C

Question: 9

A creative operations manager notices contributors are uploading duplicate versions of the same campaign image because existing approved assets are difficult to locate. What is the most effective corrective action?

- A. Disable Collections for campaign materials
- B. Improve metadata quality and tagging consistency for approved assets
- C. Separate repositories by contributor
- D. Remove Smart Tagging from upload workflows

Answer: B

Question: 10

A marketing user cannot locate a recently uploaded asset through search results. What is the most likely cause?

- A. Metadata or tagging information is incomplete
- B. Dispatcher caching is disabled

- C. Cloud Manager deployment failed
- D. OSGi services are inactive

Answer: A
