# Latest Version: 6.0

## Question: 1

A customer asks the architect to document how centralized authentication and policy enforcement operate across wired and wireless infrastructure. Which documentation component is MOST appropriate?

- A. Identity and policy workflow diagrams
- B. Office parking maps
- C. Printer inventory spreadsheets
- D. Employee scheduling templates

**Answer: A**

## Question: 2

A customer requests final operational documentation for support teams responsible for managing wireless access, authentication services, and campus segmentation policies. Which documentation components should the architect include?  
(Select TWO)

- A. Office furniture inventories
- B. Operational workflow guidance
- C. Troubleshooting procedures
- D. Employee onboarding records

**Answer: B,C**

## Question: 3

A customer questions whether the proposed architecture can maintain consistent wireless policies across multiple campus locations managed by different IT teams. Which response BEST defends the solution?

- A. Describe cafeteria modernization projects
- B. Review printer deployment inventories
- C. Discuss office seating plans
- D. Explain centralized policy governance

**Answer: D**

### Question: 4

A customer wants to improve wireless roaming performance for collaboration applications used across multiple buildings. Which environmental details should the architect analyze?  
(Select TWO)

- A. Existing RF coverage patterns
- B. Wireless roaming behavior
- C. Cafeteria staffing schedules
- D. Printer replacement cycles

**Answer: A,B**

### Question: 5

A customer plans to support future campus growth while minimizing architectural redesign and operational disruption. Which design principles should the architect prioritize?  
(Select TWO)

- A. Independent unmanaged switching
- B. Single-controller dependency
- C. Centralized operational management
- D. Modular scalable architecture

**Answer: C,D**

### Question: 6

A customer asks how the proposed architecture supports future wireless expansion and increasing device density across multiple campus buildings. Which response BEST addresses this concern?

- A. Describe printer maintenance policies
- B. Review employee onboarding schedules
- C. Discuss office furniture standards
- D. Explain modular scalable wireless design

**Answer: D**

### Question: 7

A customer reports operational inefficiencies caused by separate management tools for wireless access points, campus switches, and security policies. Which HPE Aruba Networking capability BEST addresses this challenge?

- A. Aruba Central unified management
- B. Static VLAN segmentation
- C. Independent local administration
- D. Dedicated unmanaged switching

**Answer: A**

### Question: 8

A customer requests documentation explaining how guest traffic, employee access, and IoT devices are securely separated within the proposed architecture. Which documentation component BEST supports this requirement?

- A. Printer deployment inventory
- B. Office seating charts
- C. Segmentation and policy diagrams
- D. Employee scheduling reports

**Answer: C**

### Question: 9

During a design review, a stakeholder asks how the proposed wireless architecture improves roaming performance for collaboration applications used across multiple buildings. Which response BEST addresses this concern?

- A. Describe cafeteria scheduling procedures
- B. Review office parking assignments
- C. Discuss printer maintenance contracts
- D. Explain centralized mobility management

**Answer: D**

### Question: 10

A customer requires implementation documentation that minimizes operational disruption during wireless controller migration activities. Which documentation components should the architect include?

(Select TWO)

- A. Migration validation checkpoints
- B. Rollback and recovery guidance
- C. Employee cafeteria schedules
- D. Printer lifecycle tracking

**Answer: A,B**
