Question: 1

A customer completed migration validation but found that monitoring alerts still point to old workload locations. What should be updated?
Response:

A. Monitoring configuration
B. Migration wave names
C. Project meeting notes
D. Source server labels

Answer: A

Question: 2

A customer is deploying Exchange and SQL Server on the same HPE platform. Each workload has different recovery and performance needs. What should the architect recommend?
Response:

A. Workload-specific policies
B. One policy for all systems
C. No recovery tiers
D. Random resource allocation

Answer: A

Question: 3

A customer's VMware administrators want to simplify hardware lifecycle operations across multiple clusters. Which HPE solution value should be emphasized?
Response:

A. Consistent lifecycle management
B. Manual host-by-host tracking
C. No firmware governance process
D. Separate procedures for each cluster

Answer: A

Question: 4

A customer is implementing Microsoft workloads on HPE infrastructure. The design includes compute and storage, but identity integration and monitoring are not documented. What is the main concern?
Response:

A. Operations integration is incomplete
B. Compute sizing is always invalid
C. Storage cannot support Microsoft
D. Identity services are optional

Answer: A

Question: 5

A customer asks why it should run Microsoft workloads on HPE infrastructure instead of continuing with aging hardware. Which response is strongest?
Response:

A. It improves supportability
B. It removes all planning
C. It avoids all upgrades
D. It skips workload review

Answer: A

Question: 6

A customer wants an HPE solution for Microsoft Exchange. The business requires fast recovery after failure and predictable mailbox performance. Which design area is most relevant?
Response:

A. Storage and recovery design
B. Unvalidated host refresh
C. Single-site backup storage
D. Deferred mailbox planning

Answer: A

Question: 7

Visit us at: https://www.examsboost.com/test/hpe2-b11

A customer wants to run SQL Server analytics and transaction workloads on the same platform. Which two benefits can HPE infrastructure provide when properly designed?
Choose two.
Response:

A. Tuned compute and memory
B. Appropriate storage performance
C. Ignored workload isolation
D. Unplanned capacity growth
E. Single-path data access

Answer: A,B

Question: 8

A customer wants a VMware platform that supports both existing virtual machines and future private cloud services. Which HPE positioning approach is most suitable?
Response:

A. Design for current needs and future services
B. Ignore future requirements until renewal
C. Replace VMware with physical servers
D. Avoid lifecycle and automation planning

Answer: A

Question: 9

A customer runs business-critical VMware workloads on aging infrastructure. The customer wants to reduce unplanned downtime and simplify lifecycle operations while preserving its existing VMware operational model.
Which positioning message is most appropriate?
Response:

A. Position HPE infrastructure optimized for VMware availability and lifecycle management
B. Recommend replacing VMware with unmanaged standalone physical servers
C. Suggest delaying infrastructure modernization until the next outage occurs
D. Position only additional storage capacity without reviewing operations

Answer: A

Question: 10

A customer is preparing a production handoff for Microsoft workloads on HPE infrastructure. The technical deployment is complete, but support teams have not accepted runbooks. What is the primary concern?
Response:

A. Handoff readiness is weak
B. Hardware sizing is complete
C. Rack labeling is excessive
D. Workload count is too high

Answer: A
