Question: 1

Why is it crucial to thoroughly understand the customer's specific needs, expectations, and environment before drafting the statement of work (SOW)?

A. It ensures that the customer will provide in-house training for their employees.
B. It guarantees that the server will be configured and ready to install out of the box.
C. It helps in avoiding potential costly mistakes and prepares an upgrade path for the future.
D. It allows the customer to immediately achieve their business goals without further adjustments.

Answer: C

Question: 2

When designing an HPE solution that requires high availability, what is the primary reason for including redundant components and clustering software?

A. To increase the number of users the application can support
B. To ensure compatibility with existing virtualization technologies
C. To eliminate single points of failure in the infrastructure
D. To reduce the overall cost of IT resource allocation

Answer: C

Question: 3

What advantage does HPE Zerto provide through its orchestration and automation capabilities in terms of recovery processes for large-scale environments?

A. It automates manual processes and allows frequent nondisruptive testing
B. It limits testing to non-business hours to avoid interference
C. It requires additional software for compliance and reporting
D. It separates orchestration from automation to prevent disruptions

Answer: A

Question: 4

Visit us at: https://www.examsboost.com/test/hpe0-j81

How does HPE Zerto ensure effective recovery of multi-VM applications while maintaining consistency across VMs with different roles, such as web servers and databases?

A. By allowing each VM to be restored independently at different times
B. By offering separate policies for web servers and databases
C. By creating recovery points with write order fidelity across al[VMs
D. By requiring manual intervention for boot order management

Answer: C

Question: 5

In what way does the revival of tape as a data storage solution provide an advantage in terms of data protection?

A. Tape significantly reduces the need for physical data center space.
B. Tape ensures compatibility with all existing cloud storage platforms.
C. Tape provides faster data retrieval times than disk-based solutions.
D. Tape offers offline and off-premises protection against ransomware attacks.

Answer: D
