Question: 1

A large organization introduces SIAM, but several suppliers continue prioritizing their own contractual objectives over the overall business service. Which challenge is most evident?

- A. Lack of collaboration across the service ecosystem
- B. Excessive end-to-end governance
- C. Too much business alignment
- D. Overuse of integrated performance measures

Answer: A

Question: 2

An organization experiences repeated disputes over incident ownership because supplier responsibilities overlap. Which action would most effectively address this issue?

- A. Allow every supplier to create independent escalation paths
- B. Remove the Service Integrator role
- C. Clearly define roles, responsibilities, and interfaces
- D. Reduce communication between providers

Answer: C

Question: 3

In a SIAM ecosystem, what is the main role of service providers?

- A. To define all business outcomes independently
- B. To deliver agreed services or service components
- C. To remove governance from the customer organization
- D. To replace the service integrator's coordination role

Answer: B

Question: 4

What is the primary benefit of having standardized processes across multiple service providers?

- A. Improved coordination and consistent service delivery
- B. Elimination of governance activities
- C. Removal of supplier accountability
- D. Independent operational decision-making

Answer: A

Question: 5

Why should change management be coordinated across all providers participating in a SIAM ecosystem?

- A. Governance is unnecessary during change implementation
- B. Each supplier should schedule changes without notification
- C. Technical teams should approve only their own changes
- D. Changes implemented by one provider may affect services delivered by others

Answer: D

Question: 6

A critical incident requires action from three different providers. Which process characteristic is most important in a SIAM environment?

- A. Independent incident resolution by each supplier
- B. Coordinated incident management across provider boundaries
- C. Separate customer communications from every provider
- D. Technical ownership by the first responding supplier only

Answer: B

Question: 7

After SIAM has been successfully introduced, governance meetings occur regularly, supplier collaboration improves, and performance data is reviewed to identify optimization opportunities. Which roadmap stage best matches this situation?

- A. Discovery and Strategy
- B. Plan and Build
- C. Implement
- D. Run and Improve

Answer: D

Question: 8

During a governance review, stakeholders discover that providers optimize their own contractual targets instead of improving the overall customer experience. Which SIAM practice most directly addresses this issue?

- A. Align measurements with end-to-end business outcomes
- B. Increase the number of supplier-specific KPIs only
- C. Eliminate integrated service reporting
- D. Evaluate providers independently without collaboration

Answer: A

Question: 9

Several providers consistently meet their individual service targets, yet business users continue to report poor service quality. Which process should be reviewed first?

- A. Individual supplier budgeting
- B. End-to-end continual service improvement
- C. Local technical optimization only
- D. Independent provider reporting schedules

Answer: B

Question: 10

Which activity is most appropriate for the Service Integrator?

- A. Approving business investment strategies
- B. Delivering every technical service directly
- C. Coordinating governance across multiple providers
- D. Performing supplier contract negotiations only

Answer: C
