 - ✓ Questions and Answers in PDF Format.

Question: 1

DRAG DROP

Drag and drop the Cisco WSA methods from the left onto the correct deployment modes on the right.

Explanation:

You could use an explicit setting (browser config/PAC/WPAD) or transparent (WCCP/PBR) to point to the first proxy and then the first proxy will route based on category to one of the two upstream proxies based on your policy configuration.

Question: 2

What causes authentication failures on a Cisco WSA when LDAP is used for authentication?

- A. when the passphrase contains only 5 characters
- B. when the passphrase contains characters that are not 7-bit ASCI
- C. when the passphrase contains one of following characters '@ # \$ % ^'
- D. when the passphrase contains 50 characters

Answer: B
