Question: 1

An administrator is configuring a new Self-Service project. There is a Playbook targeting VMs with the respective CalmProject category that automates post-deployment tasks (such as tagging, monitoring and sending notifications).
After assigning the blueprint and users, the administrator wants to validate that the Project and Playbook configurations are functioning as created before user deployment begins.
Which two steps should the administrator take to complete this task? (Choose two.)

A.Run the Playbook manually using the "Execute" option in Prism Central to test its logic.
B.Run the Playbook manually using the "Execute on behalf of" option in Prism Central to test its logic.
C.Deploy the blueprint associated with the Marketplace and verify that the Playbook executes as expected.
D.Deploy the blueprint associated with the Project and verify that the Playbook executes as expected.

Answer: AD

Question: 2
