Question: 1

The Visual Policy Editor (VPE) in F5 BIG-IP APM is used for:
Response:

A. Configuring IP addresses and VLANs.
B. Monitoring real-time network traffic.
C. Creating and modifying access policies.
D. Installing and updating SSL certificates.

Answer: C

Question: 2

What is the limitation of two units per HA pair in BIG-IP APM configurations?
Response:

A. It restricts the number of concurrent user sessions allowed.
B. It limits the number of access profiles that can be deployed.
C. It reduces the maximum number of virtual servers that can be configured.
D. It restricts the number of BIG-IP devices that can participate in HA.

Answer: D

Question: 3

When configuring a Kerberos SSO object, what is the primary requirement for the Service Principal Name (SPN)?
Response:

A. The SPN must be globally unique across all domains.
B. The SPN must be registered in Active Directory's Service Principal Name list.
C. The SPN must contain the IP address of the Kerberos Key Distribution Center (KDC).
D. The SPN must include the user's password for secure authentication.

Answer: B

Question: 4

What is the purpose of Federated Authorization?
Response:

A. Enforce access control policies within a single domain.
B. Enable single sign-on across multiple applications within the same domain.
C. Share user identity and access information across multiple domains.
D. Authenticate users using a third-party authentication service.

Answer: C

Question: 5

In which scenario would you choose SAML-based SSO over Kerberos-based SSO?
Response:

A. When you need to provide transparent authentication for Windows devices.
B. When you want to integrate with an external vendor IdP like Okta or PING.
C. When you need to support multi-factor authentication using RSA SecurID.
D. When you want to enable single logout (SLO) functionality.

Answer: B

Question: 6

What actions can be performed using message boxes in VPE?
(Select all that apply)
Response:

A. Displaying custom messages to end-users
B. Showing variable values during the authentication process
C. Redirecting users to a specific webpage after successful authentication
D. Displaying user group membership details

Answer: A,B

Question: 7

What happens when you reconfigure a deployed iApp to update objects?

Response:

A. The iApp configuration will be deleted, and all objects redeployed.
B. The objects associated with the iApp will be updated according to the new configuration.
C. The iApp template will be updated, and all existing objects will be unaffected.
D. The iApp will be disabled, and manual changes can be made to the objects.

Answer: B

Question: 8

What does Access Policy Sync in BIG-IP APM help achieve in terms of end-users and device fail-over?
Response:

A. It ensures that all end-users have access to the same applications during device failover.
B. It maintains user sessions during device fail-over to prevent interruptions.
C. It allows end-users to access the BIG-IP device's configuration settings.
D. It provides real-time monitoring and alerting for device fail-over events.

Answer: B

Question: 9

What is the primary use case of a Secure Web Gateway (SWG) in BIG-IP APM deployments?
Response:

A. To enforce access policies for specific user groups
B. To protect resources from DDoS attacks
C. To provide web filtering and content security services
D. To enable Multi-Factor Authentication (MFA) for user logins

Answer: C

Question: 10

How can you identify user session details in BIG-IP APM?
Response:

A. By inspecting the APM log files on the BIG-IP device
B. By querying the BIG-IP database for session information
C. By analyzing TCP/UDP ports used for application services
D. By reviewing session reports generated by the BIG-IP device

Answer: D
