Latest Version: 6.0

Question: 1

HCP's _____ feature enables users to access previous versions of an object, protecting against accidental deletions or modifications.

Response:

- A. multi-tenancy
- B. object versioning
- C. data deduplication
- D. metadata tagging

Answer: B

Question: 2

Select the components that must be considered when creating and managing HCP storage pools.

Response:

- A. The physical storage media type (SSD, HDD)
- B. The coffee machine location relative to the server room
- C. The redundancy and replication settings
- D. The data tiering and archiving policies

Answer: A,C,D

Question: 3

_____ policies in HCP can be configured to automatically delete objects that are no longer needed or that have reached the end of their retention period.

Response:

- A. Lifecycle
- B. Security
- C. Replication
- D. Namespace

Answer: A

Question: 4

Which command is used to create a bucket in HCP using the REST API via curl?

Response:

- A. curl -X POST -H 'Authorization: HCP {username}:{password}' 'http://{HCP_system}/rest/{bucketName}'
- B. curl -X PUT -H 'Authorization: HCP {username}:{password}' 'http://{HCP_system}/rest/{bucketName}'
- C. curl -X GET -H 'Authorization: HCP {username}:{password}' 'http://{HCP_system}/rest/{bucketName}'
- D. curl -X DELETE -H 'Authorization: HCP {username}:{password}' 'http://{HCP_system}/rest/{bucketName}'

Answer: B

Question: 5

For successful failover in HCP, which components need to be accurately configured?

Response:

- A. DNS settings to redirect traffic
- B. The cooling system of the data center
- C. IP load balancing rules
- D. Replication policies and priorities

Answer: A,C,D

Question: 6

HCP is designed to manage data across its lifecycle. Which of the following is NOT a feature of HCP?

Response:

- A. Data tiering
- B. Deduplication
- C. Real-time analytics
- D. Custom metadata tagging

Answer: C

Question: 7

In an HCP system, which components are responsible for data replication?

Response:

- A. S-Nodes
- B. R-Nodes
- C. Management Nodes
- D. G-Nodes

Answer: A,B

Question: 8

Which of the following are critical considerations when configuring HCP for replication?

Response:

- A. Network bandwidth and latency
- B. Total number of namespaces in the source HCP system
- C. Data change rate and volume
- D. Size of the storage pool

Answer: A,C

Question: 9

When configuring HCP for integration with Microsoft Active Directory, which of the following are required?

Response:

- A. The domain name of the Active Directory
- B. The IP address of the nearest coffee shop
- C. Administrator credentials for the Active Directory
- D. The IP addresses of the Domain Controllers

Answer: A,C,D

Question: 10

Advanced usage of content classes in HCP for search purposes might involve:

Response:

- A. Creating a universal content class applied to all objects regardless of their metadata.
- B. Dynamically modifying content class definitions based on search query frequencies.
- C. Applying multiple content classes to a single object to reflect different metadata attributes.

D. Using content classes to physically separate data onto different storage devices.

Answer: C
