Question 1. (Multi Select)

When configuring the HCP-CS Bucket Lifecycle Policy, what factors should be considered? (Choose Three)

Response:

A: Physical location of the data center
B: Automatic archival of old objects
C: Retention period of the objects
D: Color scheme of the storage interface
E: Deletion of expired objects

Correct Answer: C, A, D

Question 2. (Single Select)

In the process of collecting HCP-CS log files, what is an important consideration for maintaining security?

Response:

A: Log files should be encrypted before storage
B: Logs should only include error messages
C: Only senior managers should have access to log files
D: Log collection must be scheduled during off-peak hours

Correct Answer: A

Question 3. (Single Select)

How does HCP-CS ensure data encryption keys are secure?

Response:

A: By storing them in plain text files

B: By using a dedicated physical storage device for keys

C: By distributing keys across multiple network nodes

D: By managing them through an encrypted KMS Vault

Correct Answer: D

Question 4. (Single Select)

How are HCP-CS database metadata partitions typically structured?

Response:

A: Hierarchically to enhance data retrieval speed

B: In a flat, non-hierarchical format for simplicity

C: Dynamically partitioned based on data type

D: Geographically distributed for disaster recovery

Correct Answer: C

Question 5. (Single Select)

Which of the following is a key functionality of service management in IT systems?

Response:

A: Overclocking CPU on critical servers

B: Allocating office spaces and resources

C: Managing lifecycle of IT services

D: Conducting penetration testing periodically

Correct Answer: B
