Question: 1

A backup of 12 GB of data is reduced by a deduplication algorithm to 2 GB of data

a. What is the deduplication ratio?

Response:

- A. 1:6
- B. 1:12
- C. 12:1
- D. 6:1

Answer: D

Question: 2

Which is a data protection service?

Response:

- A. Infrastructure as a service
- B. Replication as a service
- C. Container as a service
- D. Platform as a service

Answer: B

Question: 3

What are the three pillars of data security and management?

Response:

- A. Security, Confidentiality, and Integrity
- B. High availability, Integrity, and Compliance
- C. Integrity, Governance, and Compliance
- D. Confidentiality, Integrity, and Availability

Answer: D

Question: 4

What are three types of backups?

Response:

- A. Image, Object, and Block
- B. Block, File, and Object
- C. NDMP, Image, and Object
- D. File, Block, and Image

Answer: D

Question: 5

Which is an example of an informational alert?

Response:

- A. Soft media error
- B. Orchestration failure
- C. Creation of a storage pool
- D. The file system is becoming full

Answer: C

Question: 6

A cloud service provider only manages data replication and IT infrastructure at disaster recovery sites. Which backup service type is being implemented?

Response:

- A. Remote Backup Service
- B. Cloud to Cloud Backup
- C. Replicated Backup Service
- D. Local Backup Service

Answer: C

Question: 7

Which backup topology has the least impact on the LAN?

Response:

- A. Cloud-based

- B. LAN-based
- C. Direct-attached
- D. NAS-based

Answer: C

Question: 8

What is a function of an API?

Response:

- A. Provides storage migration capabilities
- B. Schedules backup and recovery for an application
- C. Can be accessed only by CLI
- D. Enables communication with an application

Answer: D

Question: 9

What is a disadvantage of source-based deduplication?

Response:

- A. Requires more network bandwidth to send data across LAN or WAN during the backup
- B. CPU cycles may impact application performance
- C. High network load since the client checks all segments on the deduplication server device
- D. Increases CPU utilization in the backup appliance

Answer: B

Question: 10

A storage administrator wants to replicate the data to a remote site without impacting application response time. Which replication mode can achieve this?

Response:

- A. Clone
- B. Pointer-based
- C. Asynchronous
- D. Synchronous

Answer: C
