**Answer: D**

## Question: 8

You have designed a decision tree that you want to test. You want to verify that the system can evaluate every row regardless of the input values. How do you test your decision tree logic?
Response:

A. Check the decision tree for conflicts.
B. Checking for conflicts verifies that the system can evaluate every row by identifying one or more branches that cannot be reached. If a branch is unreachable, the test values are not evaluated.
C. Add the decision tree to a decision shape and create cases that use various test values.
D. Run the case and use the Tracer tool.
E. Check the decision tree for completeness.

**Answer: A**
