Question: 1

What is a primary benefit of implementing certificate-based authentication in Aruba networks?
Response:

- A. Eliminates the need for passwords
- B. Increases network bandwidth
- C. Speeds up DHCP resolution
- D. Prevents VLAN hopping

Answer: A

Question: 2

A security administrator detects unauthorized wireless access points being deployed in the corporate network. Which Aruba solution should be implemented to mitigate this threat?
Response:

- A. Enable WIPS
- B. Deploy 802.1X authentication
- C. Implement QoS policies
- D. Enable PoE detection

Answer: A

Question: 3

In implementing role-based access control (RBAC) with Aruba ClearPass Policy Manager, what determines the access privileges assigned to a user?
Response:

- A. User's IP address
- B. Time of day
- C. User's role within the organization
- D. Device MAC address

Answer: C

Question: 4

In the context of Aruba's security solutions, what does AppRF primarily monitor?

Response:

- A. Wireless signal strength
- B. Application traffic and performance
- C. Device battery status
- D. Firmware version compliance

Answer: B

Question: 5

An Aruba network administrator is investigating a suspected security breach that occurred two days ago. The administrator needs to determine the entry point of the attack. Which logs should be analyzed first?
Response:

- A. LLDP neighbor discovery logs
- B. VLAN trunking logs
- C. DHCP lease logs
- D. Aruba ClearPass authentication logs

Answer: D

Question: 6

Which security threats can Aruba's Wireless Intrusion Prevention System (WIPS) detect?
(Select two.)

Response:

- A. VLAN Trunking misconfigurations
- B. Wireless Man-in-the-Middle (MitM) attacks
- C. Rogue Access Points
- D. Incorrect QoS prioritization

Answer: B,C

Question: 7

Which Aruba security solutions integrate CPDI and ClearPass Policy Manager for policy enforcement?
(Select two.)

Response:

- A. Aruba Policy Enforcement Firewall (PEF)
- B. Aruba NetEdit
- C. Aruba EdgeConnect
- D. Aruba AI-powered analytics

Answer: A,D

Question: 8

Which techniques are used in forensic analysis for Aruba network security?
(Select two.)

Response:

- A. Log file analysis
- B. Memory forensics
- C. VLAN pruning
- D. Dynamic VLAN assignment

Answer: A,B

Question: 9

Which Aruba security mechanisms prevent unauthorized access to enterprise networks?
(Select two.)

Response:

- A. DNS Load Balancing
- B. Port-based 802.1X authentication
- C. Static Routing
- D. MACSec encryption

Answer: B,D

Question: 10

An Aruba administrator notices an increase in unauthorized network access attempts. Which log type should be analyzed first?

Response:

- A. Port mirroring logs
- B. VLAN logs
- C. DHCP logs
- D. Authentication logs

Answer: D
