## Question: 1

Image assessment findings will not be enforced unless the associated _____ is properly configured and deployed in the Kubernetes environment.
Response:

A. audit trail
B. runtime sensor policy
C. admission controller
D. image trust tag

**Answer: CC**

## Question: 2

A containerized workload that spawns a background shell process outside of its original image configuration is considered a _____ event.
Response:

A. validation
B. benchmark
C. drift
D. kill-chain

**Answer: C**

## Question: 3

What is the function of cloud groups in CrowdStrike Falcon Cloud Security?
Response:

A. To define workload scaling thresholds
B. To automate image scanning on a schedule
C. To logically organize cloud accounts and assign responsibility
D. To configure Kubernetes runtime profiles

**Answer: C**

## Question: 4

What can cause image assessment findings to be suppressed in the console?
(Choose two)
Response:

A. CSPM module not licensed
B. Image exclusions match repository patterns
C. Dockerfiles contain Falcon agent references
D. Image scan is scoped to a different registry

**Answer: B,D**

## Question: 5

Which type of activity would be flagged as suspicious during IAM user account audits?
Response:

A. Periodic role revalidation
B. MFA enforcement
C. Privilege escalation via API call
D. Login from a whitelisted IP

**Answer: C**

## Question: 6

What does an image assessment report in Falcon primarily evaluate?
Response:

A. Container network policies
B. Application CPU utilization
C. Malware, CVEs, secrets, and misconfigurations
D. Kubernetes node performance

**Answer: C**

## Question: 7

Which two findings would indicate risky IAM practices?

(Choose two)
Response:

A. MFA disabled on admin accounts
B. IAM user created within last 24 hours
C. Inline policy with full access to all resources
D. Use of multiple availability zones

**Answer: A,C**

## Question: 8

If a newly registered Azure subscription is not returning data, verify that the CrowdStrike app registration has _____ roles assigned.
Response:

A. Storage Blob Data Reader
B. Reader and Contributor
C. Kubernetes Admin
D. Network Policy Operator

**Answer: B**

## Question: 9

What capability does the Kubernetes Admission Controller provide within CrowdStrike Falcon Cloud Security?
Response:

A. Schedules container scans
B. Blocks or allows container deployments based on policy
C. Encrypts data in motion
D. Monitors IAM user behavior

**Answer: B**

## Question: 10

Which two challenges are addressed by Kubernetes admission controller policies?
(Choose two)
Response:

A. Automatic data masking
B. Enforcing image assessment before deployment
C. Preventing drift detection
D. Blocking insecure workloads at runtime

**Answer: B,D**
