Question: 1

Why are DDoS attacks a critical concern in IoT networks?
Response:

A. They enhance sensor accuracy
B. They ensure network uptime
C. They can cripple entire IoT infrastructures using botnets
D. They reduce energy usage

Answer: C

Question: 2

What are two benefits of cloud integration in IoT architecture?
(Select Two)
Response:

A. Scalability
B. Local-only data buffering
C. Global data access
D. Real-time analog control

Answer: A, D

Question: 3

Which deliverable is associated with the Design phase of an IoT project?
Response:

A. Project charter
B. Architecture blueprints and interface specifications
C. Test execution logs
D. User training plan

Answer: B

Question: 4

Which characteristics describe Fog/Edge computing?
(Select Two)
Response:

A. High latency
B. Distributed processing
C. Reduced cloud dependency
D. Always centralized

Answer: B,C

Question: 5

Why are IoT devices often more vulnerable to attacks than traditional IT systems?
Response:

A. They often lack robust security controls due to limited resources
B. They are always air-gapped from the internet
C. They are managed by highly skilled users
D. They use quantum encryption by default

Answer: A

Question: 6

What is the role of sensors in an IoT ecosystem?
Response:

A. To store historical records
B. To detect and measure physical conditions like temperature or motion
C. To only power connected devices
D. To perform user access management

Answer: B

Question: 7

Which devices are typically classified as IoT endpoint "Things"?

(Select Two)
Response:

A. Surveillance cameras
B. HVAC sensors
C. TCP/IP routers
D. Power strips

Answer: A,B

Question: 8

Why is phishing considered a high-risk social engineering tactic in IoT environments?
Response:

A. It encrypts network traffic
B. It affects only physical systems
C. It tricks users into revealing credentials or installing malware
D. It automates firmware upgrades

Answer: C

Question: 9

What is the best reason to implement secure firmware update mechanisms in IoT devices?
Response:

A. To prevent malicious code injection or unauthorized changes
B. To reduce latency
C. To minimize battery usage
D. To increase screen brightness

Answer: A

Question: 10

How does IoT improve competitive position in manufacturing?
(Select Two)
Response:

A. By increasing human intervention
B. Through faster prototyping and adaptation

C. Through real-time quality monitoring
D. By reducing data visibility

<div style="text-align: center; border: 1px solid black; display: inline-block;">

Answer: B,C
