Question: 1

Which of the following are valid purposes of WSDL in SOAP services?
(Choose two)

- A. Define data persistence strategy
- B. Validate JSON against schema
- C. Specify operation names and message formats
- D. Define endpoint address and bindings

Answer: C,D

Question: 2

You need to schedule a Route to trigger every 10 minutes. Which components and configurations are necessary?
(Choose two)

- A. cTimer with repeat interval
- B. Use cron expression in cTimer
- C. cMulticast with retry pattern
- D. cAggregator with delay logic

Answer: A,B

Question: 3

What is the primary function of Talend API Tester?

- A. To visualize microservices communication
- B. To test and validate API behavior using assertions
- C. To define OpenAPI contracts
- D. To deploy services to Talend Runtime

Answer: B

Question: 4

In a contract-first approach, what is defined before any service implementation begins?

- A. API contract including resources and methods
- B. JSON response samples
- C. Data mapping rules
- D. Talend Studio Jobs

Answer: A

Question: 5

Why is generating documentation from an API contract beneficial?

- A. It increases processing speed of requests
- B. It eliminates the need for test coverage
- C. It ensures developers adhere to the agreed interface
- D. It replaces the need for version control

Answer: C

Question: 6

What is a microservice in the context of Talend?

- A. A schema definition for JSON data
- B. A standalone REST or SOAP service packaged as a self-contained executable
- C. A large composite application containing multiple APIs
- D. A containerized database used by Talend Routes

Answer: B

Question: 7

An organization is transitioning clients from v1 to v2 of its REST API. What steps can support this migration process?

(Choose two)

- A. Maintain v1 and v2 in parallel for a period
- B. Implement redirect logic for all endpoints
- C. Update version history in Talend Studio
- D. Communicate deprecation timelines for v1

Answer: A,D

Question: 8

What distinguishes an API Portal from the API Designer interface?

- A. Both serve the same function with different UI skins
- B. API Designer allows user registration; API Portal does not
- C. API Designer is for contract design; API Portal is for external publishing
- D. API Portal is only for internal testing

Answer: C

Question: 9

Which fields must typically be defined in an API operation within API Designer?
(Choose two)

- A. Execution logging strategy
- B. Response payload schema
- C. HTTP method (GET, POST, etc.)
- D. Storage backend path

Answer: B,C

Question: 10

A developer is building a REST API to support GET and PUT on /products/{id}. What should be configured?
(Choose two)

- A. HTTP method routing within the same tRESTRequest
- B. A shared tRESTRequest with multiple input rows
- C. Separate tRESTRequest components for each verb
- D. A context variable to replace {id} in the URI

Answer: A,D
