Latest Version: 6.0

Question: 1

Generative artificial intelligence (AI), trained on a single source of information, is most likely to present which of the following quality risks, in its output?

Response:

- A. Biased information
- B. Citing false sources
- C. False positives
- D. Hallucination

Answer: A

Question: 2

Which stage of the machine learning process is concerned with feeding the chosen model with high volumes of data?

Response:

- A. Data pre-processing
- B. Data selection
- C. Data visualization
- D. Training

Answer: D

Question: 3

What generative artificial intelligence (AI) term is correctly described as "the output or result generated by the AI after processing and understanding the provided prompt"?

Response:

- A. Completion
- B. Natural language processing (NLP)
- C. Reinforcement learning
- D. Zero-shot prompting

Answer: D

Question: 4

Which of the following statements is true in relation to supervised fine tuning (SFT)?

Response:

- A. SFT only needs to be performed once.
- B. SFT removes the need for ongoing feedback.
- C. The ideal response to a prompt is authored by a human and used as training data.
- D. The ideal response to a prompt is authored by AI and reviewed by a human.

Answer: C

Question: 5

Forming a long response to a prompt is done by making predictions about the most suitable next word.

Which generative artificial intelligence (AI) tool is required to do this?

Response:

- A. Databases
- B. Human testers
- C. Prompts
- D. Transformers

Answer: D

Question: 6

Which stage of the machine learning process involves identifying a suitable data source?

Response:

- A. Data pre-processing
- B. Data selection
- C. Data visualization
- D. Training the model

Answer: B

Question: 7

What type of prompt requires detailed human input in order to solve complex and often multilayered problems?

Response:

- A. Chain-of-thought
- B. Character
- C. Few-shot
- D. Zero-shot

Answer: A

Question: 8

Which legislation restricts unsolicited marketing communications and is applicable to chatbots?

Response:

- A. Civil Liability Act
- B. Finance Act
- C. Privacy and Electronic Communications Regulations (PECR)
- D. UK General Data Protection Regulation (GDPR)

Answer: C

Question: 9

Which of the following correctly describes the role of prompts in generative artificial intelligence (AI)?

Response:

- A. Prompts are the output of generative AI in response to a user request.
- B. Prompts are the tools which predict the best word or sentence in a response.
- C. Prompts are the user input: a request to generate an output.
- D. Prompts are virtual nudges, given to the AI when it takes too long to create a response.

Answer: C

Question: 10

When developing a generative artificial intelligence (AI) model, a human operator will rate the quality and correctness of the generated output and communicate the rating to the AI model to allow it to improve its responses.

What is this activity known as?

Response:

- A. Human rewarding
- B. Reinforcement learning from human feedback (RLHF)
- C. Response measurement from human feedback
- D. Training from human input

Answer: B
