B. A web certificate issued by a trusted Certification Authority.
C. All types of web certificates are recommended for production.
D. Certificates issued by the Certification Authority in the Windows domain.

Answer: A

Question: 4

What needs to be installed first, before proceeding with the secondary node installation of Orchestrator in deployments including Insights?
Response:

A. The primary node.
B. The RESP (REdis Serialization Protocol) solution.
C. The database initialization step.
D. Insights.

Answer: D

Question: 5

Which is the proper infrastructure model for deploying a Disaster Recovery with two Active Data Centers?
Response:

A. Minimum 3 nodes are required for both HAA and Elasticsearch in each datacenter, configured in different clusters and synchronized.
B. Minimum 3 nodes are required for both HAA and Elasticsearch in same datacenter, configured in one clusters and synchronized.
C. Minimum 5 nodes are required for both HAA and Elasticsearch in each datacenter, configured in different clusters and synchronized.
D. Minimum 5 nodes are required for both HAA and Elasticsearch in same datacenter, configured in one clusters and synchronized.

Answer: A

Question: 6

What are some of the main capabilities of UiPath Orchestrator?
Response:

A. Inter-connectivity, Networking, Logging
B. Provisioning, Logging, Configuration, Deployment
C. Configuration, Deployment, Infrastructure
D. Queues, Infrastructure, Monitoring

Answer: B

Question: 7

On a multi node Orchestrator deployment , using HAA , which is the port range needed to be open in customer firewall infrastructure for HTTPS access for the management UI?
Response:

A. TCP Port 443
B. TCP Port 8443
C. TCP Port 9443
D. TCP Port 10000

Answer: B

Question: 8

What are the licensing options when activating the standalone version of Orchestrator?
Response:

A. Runtime and online activation.
B. Standard, online, and offline activation.
C. Service, online and offline activation.
D. Online and offline activation.

Answer: D

Question: 9

Which statement describes the UiPath Orchestrator's role in unattended automation?
Response:

A. Orchestrator ensures the centralized management and delivery of package versions to robots for execution.
B. Orchestrator creates and maintains the connection between unattended Robots and the web application.
C. Orchestrator stores and indexes the logs to an SQL database and/or Elasticsearch.
D. Orchestrator allows launching unattended execution on the spot or by setting it up in a preplanned manner with triggers.

Answer: D

In what case a single node Orchestrator may be used?
Response:

A. An Orchestrator deployment on a single web server is never recommended.
B. A segregated disaster recovery deployment.
C. A small to medium scale deployment where no redundancy or scalability is required.
D. A production level deployment with as many Robot and Studio machines as needed.

Answer: C
